

## Expert viewpoints: comparing to MRSA

- ① *“Well it is certainly more debilitating for patients in terms of their morbidity and actually has as high rate as MRSA bacteremia” – US opinion leader*
- ① *“To me they are both significant but significant in different ways. Both of them can present real challenges in management” – UK opinion leader*
- ① *“Certainly when you are having an outbreak of **C.diff** disease it clearly is a bigger problem than even MRSA” – US opinion leader*
- ① *“If I had been asked 5 years ago, MRSA will have probably been considered more severe in terms of threat to life. Because C.diff severity and frequency has increased so much since 2000, I think they are now neck-and-neck” – US opinion leader*

## About VacZine Analytics:

VacZine Analytics is a brand new research consultancy based in the United Kingdom. Its aim is to provide high-quality disease and commercial analysis to those working within or in collaboration with the vaccine industry.

With our product lines:

- ② **DiseaseINFOPACK**
- ② **OpportunitySCAN**
