

Expert viewpoints: disease surveillance

- ① *“well we don’t have any surveillance in the United States – anything would be an improvement – we have no active surveillance programs going on, we have nothing that is like going on in the UK or even EU continent in terms of reporting systems” – US opinion leader*
- ① *“I think we need to get a standard definition of what’s out there and we need to apply that consistently across the nation. That’s the biggest simple thing we need to do” – UK opinion leader*
- ① *“if you talk to the CDC, they will that admit to you – that’s why they went to the ICD-9 coding to get an idea of what is going on in terms of discharges. That’s the best they could do.” – US opinion leader*
- ① *“Well the current methodologies are haphazard and inadequate....So it is really a pathetic system” – US opinion leader*

About VacZine Analytics:

VacZine Analytics is a brand new research consultancy based in the United Kingdom. Its aim is to provide high-quality disease and commercial analysis to those working within or in collaboration with the vaccine industry.

With our product lines:

- ② **DiseaseINFOPACK**
- ② **OpportunitySCAN**
