MarketVIEW: Herpes Simplex virus therapeutic vaccines (CAT: VAMV038)

| | | |
|-------------------------|---|---|
| Product Name | : | MarketVIEW: Herpes Simplex Virus (HSV) therapeutic vaccines |
| Description | : | Global vaccine commercial opportunity assessment |
| Contents | : | Executive presentation (>175 slides.pdf) + forecast model(s) (.xls) |
| Therapeutic Area | : | New adolescent/STI vaccines |
| Publication date | : | June 2022 |
| Catalogue No | : | VAMV038 |

Background

Herpes Simplex Virus (HSV-1/2) are ubiquitous members of the human herpes family and are transmitted by oral/genital contact. Both viruses cause lifelong oral/ocular and/or genital infections (GUD). Although most individuals infected with HSV-1/2 have minimal signs of infection, persons with GUD can experience frequent disease reactivation which have a considerable impact on sexual reproductive health and wellbeing. Neonatal herpes, although rare, can have devastating consequences for the new-born infant with a mortality rate of ~60-85%. The WHO has estimated that 491m persons in 2016 were living with HSV-2 globally (15-49 yrs) which is 13.2% prevalence in this age group. HSV-1 is estimated to infect 3.7 bn people worldwide. HSV-2 is also a significant contributor to global HIV incidence especially in low-income countries.

Antiviral treatments e.g., **acyclovir** do exist for HSV infections and are designed to prevent symptomatic disease, improve quality of life and suppress the virus to prevent transmission to sexual partners. A **HSV-2 therapeutic vaccine** that can suppress symptomatic disease and prevent transmission could have great utility in infected populations and bring benefits via more convenient administration profile/long-lived protection. With new mRNA-focused vaccine competitors such as **ModernaTX** and **BioNTECH** now involved with HSV vaccines e.g., **mRNA-1608**, a renewed interest in therapeutic vaccine development is expected. GSK has also initiated a Phase 1/2 study with **GSK3943104A**

This **MarketVIEW** product is a comprehensive Executive Presentation (>175 slides, .pdf) and interactive MS-Excel forecast model which investigate the scenario-based interplay and commercial potential of HSV therapeutic vaccines across key target groups in 20 nations (public/private) including North America, Europe, Australia and Japan A thorough review of latest epidemiological/impact studies is presented along with discussion of vaccinology/new R&D strategies with a focus on next generation concepts. A competitor landscape is also provided with examination of the merits of mRNA approaches.

Methodology

VacZine Analytics has closely monitored all significant source material pertaining to Herpes Simplex virus vaccines in each respective market. Source materials used are academic literature articles, government websites, medical bodies and associations, conference proceedings, social media etc. Previously published research by **VacZine Analytics** in the field of viral pathogens has also been utilised.

PRODUCT CONTENTS:

Published June 2022 (CAT No: VAMV038)

****This product is a [summary presentation \(.pdf\)](#), [an MS-workbook \(.xls\)](#)

Contents – Summary presentation (.pdf)

Contents

Author's notes

Executive summary

[SECTION 1] Herpes Simplex Virus: disease background/diagnosis/treatment

[SECTION 2] Herpes Simplex Virus: review of epidemiology/interaction with HIV

[SECTION 3] Herpes Simplex Virus: summary of vaccine development, current R&D

[SECTION 4] Herpes Simplex Virus vaccines: modelling commercial potential WEST

[SECTION 5] Herpes Simplex Virus vaccines: quantifying target populations

[SECTION 6] Herpes Simplex Virus vaccines: backup and source material

PRODUCT COST:

VacZine Analytics will grant a [enter region] license to [enter client name], for the price of:

- FULL PRODUCT - USD **\$12,995.00**/ GBP **£10,565.00**# (Region license)*

*A region is North America, Europe or ROW

For orders in the UK, VAT at 20% will be added to final invoice total

- indicative prevailing rate will be applied on date of transaction

HOW TO ORDER:

To order please contact your region account manager or order direct at orders@vaczine-analytics.com This report can also be purchased on-line. Please review the **TERMS and CONDITIONS** of purchase.
